Net Weight 40 lbs (18.20 kg)

Professional Turf Fertilizer with NUTRI-Pel

DIRECTIONS FOR USE:

For best results apply when turf is actively growing; however, when weather is extremely hot, it is best to delay or reduce fertilizer applications. Use in accordance with recommendations from a qualified source, such as, but not limited to a university crop extension service, agronomist, or apply according to recommendations in your approved nutrient management plan. Water into the turf soon after application. **DO NOT APPLY BY HAND.**

Lawns: Spread this fertilizer at the rate of 4 pounds per 1000 square feet. Apply every 4 to 6 weeks, or along with other turf care products (such as crabgrass preventer, weed & feed, insect control, etc.) as part of a total lawn care program.

Flowers and Vegetables: For large garden areas, broadcast 40 to 6 pounds per 1000 square feet in spring, at planting time. For row plantings, apply 1/4 to 1/2 pound per 100 feet. Repeat fertilizer application every few weeks to ensure vigorous growth all season. Wash vegetables before eating.

Pounds per 1000 sq.ft.	SPREADER SETTINGS					
	Cone setting	2.0 lbs	3.0 lbs	4.0 lbs	5.0 lbs	6.0 lbs

Spreader settings are intended as a guide in adjusting fertilizer application equipment. Different product analysis and/or partial sizing will affect the bulk density and spreader requirements, so always calibrate your spreader. Individual spreaders should be properly calibrated to adjust for difference in walking speed, terrain, and equipment conditions. Calibration should be done prior to product application in the desired area. To calibrate a spreader, place the proper amount of fertilizer for 500 square feet into a spreader and apply to a 500 square foot area (50 ft. x 10 ft.). Adjust the spreader settings accordingly. We recommend that the spreader be cleaned and lubricated after each use. These spreader setting guides are for standard size blends only- do not use these settings with "greens grade" or micro-prilled products.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

NOTE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and performance if this product is not used according to the directions.

STORAGE AND DISPOSAL: **Storage:** Store in a cool, dry area if possible away from food, feedstuffs, and water supplies. Reseal opened bag by folding top down and securing. **Disposal:** Dispose of contents/container in accordance with local/regional/national/international regulations. Do not reuse bag. Dispose of empty bag in trash. 91815
