Net Weight 50 lbs (22.70 kg)

Most lawn/turf grasses will typically utilize 1 to 4 pounds of nitrogen per 1000 sq ft over the growing season. As part of a total lawn care program you can apply fertilizer every 4 to 6 weeks throughout the growing season.

HJ Professional Turf Fertilizer

Howard Johnson's

DIRECTIONS FOR USE:

For best results apply when turf is actively growing; however, when weather is extremely hot, it is best to delay or reduce fertilizer applications. Use in accordance with recommendations from a qualified source, such as, but not limited to a university crop extension service, agronomist, or apply according to recommendations in your approved nutrient management plan. Water into the turf soon after application. **DO NOT APPLY BY HAND.**

FOR FLORIDA: Directions for use not to exceed rates recommended in the documents entitled, "Recommendations for N, P, K and Mg for Golf Course and Athletic Field Fertilization based on Mehlich III Extractant", online at <http://www.flrules.org/Gateway/reference.asp?No=Ref-04700> and/or "Florida Friendly Best Management Practices for Protection of Water Resources by the Green Industries", online at <http://www.flrules.org/Gateway/reference.asp?No=Ref-04706>.

Cub Cadet		12	14	16	17	18

Spreader settings are intended as a guide in adjusting fertilizer application equipment. Different product analysis and/or partial sizing will affect the bulk density and spreader requirements, so always calibrate your spreader. Individual spreaders should be properly calibrated to adjust for difference in walking speed, terrain, and equipment conditions. Calibration should be done prior to product application in the desired area. To calibrate a spreader, place the proper amount of fertilizer for 500 square feet into a spreader and apply to a 500 square foot area (50 ft. x 10 ft.). Adjust the spreader settings accordingly. We recommend that the spreader be cleaned and lubricated after each use. These spreader setting guides are for standard size blends only- do not use these settings with "greens grade" or micro-primed products.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn. Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to determine if there are local regulations for fertilizer use.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

NOTE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and performance if this product is not used according to the directions. 72816

STORAGE AND DISPOSAL:

Storage: Store locked up in a cool, dry area away from food, feedstuffs, and water supplies. Reseal opened bag by folding top down and securing.

Disposal: Dispose of contents/container in accordance with local/regional/national/international regulations. Do not reuse bag. Dispose of empty bag in trash.

Product Identifier:
Product Code: FertCa
Product Name:
Howard Johnson's
Professional Turf Fertilizer

Supplier Identification:
Manufactured and Guaranteed for
HOWARD JOHNSON'S ENTERPRISES, INC.
