

Howard Johnson's Premium Fertilizer

Pasture Fertilizer

Provides

primary nutrients for pasture and meadow grasses.

Contains

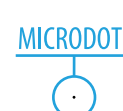

iron and sulfur to help promote rich, green grass.

Helps

pasture grasses tolerate heavy traffic and grazing.

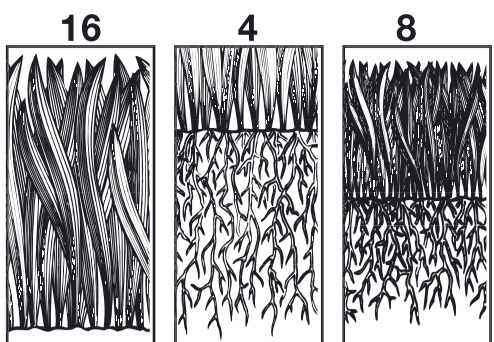

16-4-8

Covers 16,000 Sq. Ft. Net Wt. 50 lbs. (22.68 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION: SEE BACK PANEL FOR FIRST AID AND ADDITIONAL PRECAUTIONARY STATEMENTS.

GUARANTEED ANALYSIS

NITROGEN
For a lush green lawn

PHOSPHORUS
Improves root growth

POTASSIUM
Vital for growth & drought resistance

Total Nitrogen (N)	16%
1.57% Ammoniacal Nitrogen	
14.43% Urea Nitrogen*	
Available Phosphate (P ₂ O ₅)	4%
Soluble Potash (K ₂ O)	8%
Sulfur (S)	3.00%
3.00% Free Sulfur (S)	
Iron (Fe)	2.00%
0.20% Water Soluble Iron (Fe)	
Derived From: Ammonium Phosphate, Iron Sulfate, Muriate of Potash, Sulfur, Urea	
Chlorine (Cl), not more than 4% F315

WHAT

OUR PRODUCT

This quality fertilizer formula provides primary plant nutrients for all pastures and meadows. It promotes a lush green color and stronger root systems, and helps you nurture a vigorous pasture that tolerates heavy traffic and grazing.

WHEN

APPLICATION TIMING

For a lush pasture throughout the growing season, apply this fertilizer every 6 to 8 weeks throughout the growing season.

Most lawn grasses need 1 to 4 pounds of nitrogen per 1000 square feet over the growing season.

Fertilizer application can be tailored to meet the exact nutrient requirements of your lawn, by having your soil tested. Contact your university extension service of local agricultural experiment station for information on soil testing services available in your area.

HOW

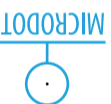

HOW TO APPLY

Spread this fertilizer on your pasture at the rate of 3 to 4 pounds per 1000 square feet. When temperatures exceed 90 degrees, or dry conditions exist, reduce the application rate by one half to prevent possible burning of the pasture.

Apply on a calm day when grass is dry, using a properly calibrated spreader. Faster greening will result if the fertilizer is watered in after application.

For more uniform spreading and to avoid streaks, cover the area two times, applying at half the recommended rate, with the second application perpendicular to the first. Do not hand spread.

Note: After fertilizing, it is best to keep horses and other animals off the pasture for at least three days.

SPREADER SETTINGS

Spreader Settings to apply at the listed rate			
Drop Spreaders		Rotary Spreaders	
Ames	14	Ames	14
Earthway	14	Earthway	14
Precision Red Devil	6	Precision Red Devil	6
Scotts AccuGreen	7.5	Cyclone Model SB3000	6.75
Scotts EvenGreen	7	Scotts EasyGreen	27
Scotts PrecisionGreen	6.5	Scotts SpeedyGreen	6

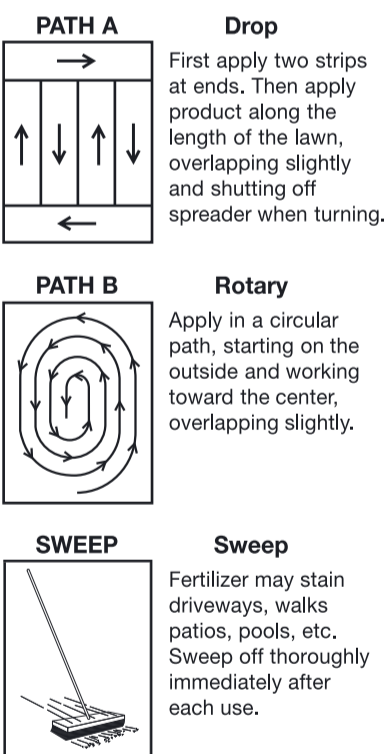

Note: Spreader settings are approximate and may vary according to the condition of your equipment. YOUR SPREADER SHOULD BE CALIBRATED BEFORE USE! Shut the spreader off when turning or stopping, to avoid over-application and possible turf damage. Excessive overlap, especially with drop spreaders, will cause over-application and possible turf damage. Clean and lubricate your spreader after use. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands in the driveway, sidewalk, or street, back onto your lawn/garden.

USE THIS FORMULA TO CALCULATE THE AMOUNT OF PRODUCT YOU NEED:

_____ Length of Property x _____ Width of Property = _____ Total Square Feet

_____ Total Square Feet - _____ Non-Lawn Areas = _____ Total Square Feet Coverage Needed

Manufacturer warrants that this product conforms to the ingredient statement on the label, and that the product is reasonably suited for the labeled use when applied according to directions. Buyer and user assumes all risks and liability of use, storage and/or handling of this product not in accordance with the terms of this label. Manufacturer makes no other warranty, express or implied, and shall not be liable for indirect or consequential damages.

KEEP OUT OF REACH OF CHILDREN

CAUTION: Fertilizer may cause skin or eye irritation. Flush contacted area with plenty of water and get medical attention if irritations persists. If Swallowed call a doctor for treatment advice.
