## PRODUCT POSITIONING

- This product provides pre-emergence control of crabgrass (large, smooth, and southern species) when applied prior to emergence of crabgrass from the ground. In addition, this product provides "early post emergence" control during the early stages of growth after crabgrass emerges from the ground. See complete label for weeds controlled.
- 25% of the Nitrogen is slow release, providing uniform growth and sustained feeding.
- Use on established turfgrasses, such as Creeping Bentgrass, Kentucky bluegrass, Fine Fescue, Tall Fescue, Perennial Ryegrass, Bermudagrass, and more. See product label for complete use and application information.
- Particles are closely matched in size to minimize segregation and maximize uniformity of spread.
- EPA Registration Number 32802-71
