

HJ ®

All-Season

ALL PURPOSE

Fertilizer

For lawns, flowers,
trees, shrubs, and
vegetable gardens.

10·20·10

Net Weight: 35 lbs. (15.90 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION: May cause irritation. On contact
with skin or eyes, flush with plenty of water.

Application Timing

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

Guaranteed Analysis	
Total Nitrogen (N)	10.00%
7.83% Ammoniacal Nitrogen	
2.17% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)	20.00%
Soluble Potash (K ₂ O)	10.00%
Derived From: Ammonium Phosphate, Muriate of Potash, Urea.	
Chlorine (Cl), not more than 6.00%	F315

 10 For a lush green lawn	 20 Improves root growth	 10 Vital for growth & drought resistance
---	--	---

Established Lawns

Spread this fertilizer at the rate of 6 to 8 pounds per 1000 square feet, or as suggested by soil testing or professional advice. Apply every 4 to 6 weeks, or along with other turf care products (such as crabgrass preventer, weed & feed, insect control, etc.)

New Lawns

Apply 5 pounds per 1000 square feet. Mix in thoroughly to a depth of 3 inches or more. Smooth seed bed by raking in an additional 3 pounds per 1000 square feet. Sod or sow seed. If seeded, firm seed bed with a light roller to keep seed in contact with moist soil. Water thoroughly with a fine spray and keep soil moist until grass appears. After the seed germinates and until it is well established, water a little heavier but less frequently to encourage deep root penetration.

Shade Trees, Fruit Trees

Apply 1 pound per inch of trunk diameter. Fertilizer is more available to tree roots when applied deep in the soil. Make holes 12 to 18 inches deep with a soil probe or pointed object at 2 foot intervals in a ring around the tree beneath the edge of the branches, and pour the plant food into each hole. Replace some of the soil. Apply in early spring before growth starts until mid-summer, or after leaves drop in the fall.

Evergreens

Feed narrow leaf, cone-bearing evergreens in the early spring only, after danger of frost is past. For groups of evergreens, apply one pound per 100 square feet. For single specimen, apply 1/4 to 1/2 pound in a ring around the outer edge.

Shrubs and Hedges

Feed in spring after danger of frost is past. Broadcast 1 pound per 100 square feet and work lightly into soil without disturbing roots. Water thoroughly after applying. Repeat application in early summer.

Flowers and Vegetables

For large garden areas, broadcast 4 to 6 pounds per 1000 square feet in spring, at planting time. For row plantings, apply 1/4 to 1/2 pound per 100 feet. Repeat fertilizer application every few weeks to ensure vigorous growth all season.

How To Apply

Apply on a calm day when the grass is dry, using a properly calibrated spreader. Faster greening will result if the fertilizer is watered in after application. When temperatures exceed 90 degrees, or dry conditions exist, reduce the application rate by one-half to prevent possible burning of the turf. For more uniform spreading and to avoid streaks, cover the area two times, applying at half the recommended rate, with the second application perpendicular to the first. Fill the spreader on a driveway or sidewalk so that any spilled material can be swept up and properly spread on the lawn.

Note: Spreader settings are approximate and may vary according to the condition of your equipment. Your spreader should be calibrated before use. Shut the spreader off when turning or stopping, to avoid over-application and possible turf damage. Excessive overlap, especially with drop spreaders, will cause over-application and possible turf damage. Clean and lubricate your spreader after use.

Spreader Settings			
Spreader Settings to apply at the listed rate (Pounds per 1000 Square Feet)			
Drop Spreaders	8 lbs	Rotary Spreaders	8 lbs
Ames	22	Ames	22
Earthway	22	Earthway	22

FCR07138

PATH A
 Drop
 First apply two strips at ends. Then apply product along the length of the lawn, overlapping very slightly and shutting off spreader when turning.

PATH B
 Rotary
 Apply in a circular path, starting on the outside and working toward the center, overlapping very slightly.

SWEEP
 Sweep (do not wash) all fertilizer materials from surfaces immediately after application, because certain fertilizer ingredients can cause permanent stains.
